

Lebenslauf

Java Developer Alexey

Verfügbar: ab sofort

Kosten: 40 Euro/Stunde

SKILLS

Programming languages:

- Java SE 8, 11 (Multithreading, Concurrent Framework, Collections, Reflection, OOP, I/O, Memory management);
- Java Web (Maven, Spring, JPA/Hibernate, JDBC);
- Java Stream API, Docker.

Version Control Systems:

- Git.

Development Environments and Tools:

- IntelliJ IDEA;
- Maven;
- Gradle;
- Kafka;
- JProfiler;
- Swagger.

Databases:

- MongoDB;
- MySQL;
- PostgreSQL;
- Netezza;
- Oracle.

Frameworks and Libraries:

- Spring;
- JUnit;
- Apache Spark;
- Selenium;
- Cucumber;
- Bootstrap.

Operating Systems:

- MacOS;
- Windows;
- Linux.

Other:

- Jenkins,
- Grafana,
- ELK.

EDUCATION**Kharkiv National University of Radio and Electronics****Computer Science**

Kharkiv, Ukraine

EXPERIENCE**Project: NDA****Java Developer**

01.2021 - 03.2022

Development of a system for finding Internet providers around the world, searching for available services and their prices. Daily communication with the customer. Large distributed development team around the world - about 20 people.

Responsibilities:

- Implementation of new features and bug fixing;
- PR reviewing and management of the development cycle;
- Improving application performance;
- Support for various ways of working with databases;
- Demo calls with a client.

Technologies: Java 8; Spring; REST; SOAP; MySQL; Hibernate; Testing tools, RabbitMQ.

Project: KnubiSoft**Java Developer**

05.2020 - 05.2021

Cryptocurrency exchange with more than 500 trading pairs, KYC, trading monitoring system, and many payment methods. Integration with a test tool. Communication with third-party systems and data synchronization. Showing demo versions and development in teams of various sizes - from 2 to 8 people.

Responsibilities:

- Bug fixing, debug and performance issues fixing;

- Design and implement new components;
- Refactoring of existing components;
- Troubleshoot production issues.

Technologies: Java SE, MySQL, AuroraDB, RabbitMQ, Spring JDBC, Docker, microservices, SpringBoot, websockets, payment systems (pay-pal, qiwi, custom payment APIs).

Project: Exadel Inc.

Java Developer

01.2019-04.2020

I've been working on the Big Data - Nielsen project for about one year. This project is a part of a large Nielsen project system written in Java, which is including some modules for performing ETL processes (from Netezza to MongoDB) and some modules for providing REST API for getting these data.

Responsibilities:

- Implementation of tasks using Java 8;
- Develop JUnit tests and work on integration testing;
- Improving application performance, code refactoring;
- ETL processes fixing;
- Work with relational and non-relational databases: MongoDB, Netezza and Oracle;
- Implementation of tasks using Scala;
- Work with Docker and Kafka;
- Work with Amazon S3 buckets.

Technologies: IntelliJ IDEA, Spring, JUnit, Kafka, Maven, Swagger, Spark.

Project: SYTOSS

Java Developer

07.2016-12.2018

Telecommunications company that provides Internet and mobile services for European countries. We developed an application for booking luggage storage with a notification system. Our team consisted of 6 developers, 2 testers and 1 BA. I worked both as a Backend developer and as a Frontend Developer. Adding new services, maintaining existing products and a user account in the mobile application.

Responsibilities:

- Implementation of tasks using Java 8;
- Work with microservices architecture;
- Creating notification (Spring Notification);
- Writing automated tests in Java and JS;
- Implementation of UI tasks in Angular 2;

- Implementation of tasks in React (micro-frontend architecture);
- Work with PostgreSQL;
- Develop mobile app with supporting more than 90% devices;
- Adding Swagger documentation to the code.

Technologies: IntelliJ IDEA, Spring, Angular 2, Selenium + Cucumber, Maven, JUnit; Postman; MS SQL, Android Studio; Test Flight; Android Studio Emulator.

LANGUAGES

English – Upper-Intermediate
Russian – Native
Ukrainian – Native

SUMMARY

- Java Developer with 5 years of professional experience.
- Strong technical experience in the development Rest API, design of new components, refactoring existing code, testing.
- Professional experience highload services, measure performance, implement statistics dashboards, debug and fix slow segments.
- Work on projects with architectures such as microservices and micro-frontend.
- Professional experience highload services, measure performance, implement statistics dashboards.
- Takes a leading role in all stages of software development life cycle starting with pre-sales activities up to the release.
