SUMMARY

In the past, I was a mathematician, teacher, entrepreneur and manager. But the development of computer technology has always attracted me and won in the end. I wrote my first program 30 years ago. And since that time I have always been somehow connected with IT. For more than 10 years I was working with PHP. Now my background allows me to quickly advance and master the skills of a FullStack Web developer with focus on **Nodejs** and **Reactjs**.
