Russian – Proficient

EXPERIENCE

Project: UpStack
Full-stack Ruby on Rails developer
September 2019 – September 2022

Participate in the development of the web application for the data centers marketplace. Made changes in the database structure for specific parts of the application. Participated in the redesign of the main application forms for the customer side and redesign of automated emails. Built CSV importers and exporters for a large number of data. Optimized specific front-end and back-end parts.

Technologies used: Ruby, Ruby On Rails, Postgresql, React JS, TypeScript, HAML, Rspec, Capybara, Google Maps, Sidekiq, Redis, Sendgrid, Datadog, AWS S3, AWS CloudFront, Github Workflows, Jest testing.

Project: Cablook Taxi
Full-stack, Ruby on Rails developer
2018-2019

Developed a food delivery system maintained at various restaurants provided at Cablook Taxi app. My responsibilities included both developing the back-end using Rails and developing the front-end using Preact. I participated in setting up a wrapper for our website in an APP for IOS devices.

Technologies used: Ruby, Ruby on Rails, Preact, RSpec, Capybara, Firebase, One Signal, ROAR, Dry Validation, WayForPay, WebSockets, Telegram Bot Api, Sidekiq, Redis, MapBox, iOS WebView.

Project: TwentyEightHealth
Full-stack Ruby on Rails developer
2018 – 2018

Participated in the development of the web application for easy communication between the doctor and the patient based on developed chat by our team using websockets. Took part in the "smart" intake form development, verification patients and connection payments using the GreenMoney system.

Technologies used: Ruby, Ruby on Rails, JavaScript, jQuery, Slim, Postgresql, Rspec, Sidekiq, Redis, Intercom, GreenMoney, Bootstrap.

Project: KnockKnockCity
Full-stack Ruby on Rails developer
2017 – 2018

Participated in the development of the web application for the USA Luggage Storages company. Designed and developed automating process users to leave bags for storage using QR codes. Participated in the development of a universal way to implement the app for all around the United States. Implemented the Guesty system for property managers. Worked out a tourist communicative system with technical support of our portal, that was called Intercom. Integrated Stripe payment system for all transactions.

Technologies used: Ruby, Ruby on Rails, JavaScript, jQuery, Slim, Pure CSS, Postgresql, Rspec, Capybara, Stripe, Sidekiq, Redis, Intercom, Twilio, Mapbox, Geocoder, Guesty.

SUMMARY

Middle+ Ruby on Rails engineer with over 5 years of commercial experience in web development. Experience in integration payment and messaging systems and high-performance application development.
