

## Lebenslauf

# Frontend Software Engineer Oleksii

Verfügbar: ab sofort

Zielgehalt: 73 00 Euro/Jahr

### SKILLS

- Javascript (es5/es6)
- Typescript
- Angular
- RxJS
- lodash
- Stencil.js
- Material
- Bootstrap
- PrimeNG
- Syncfusion
- Ag-grid
- Matrix.js
- Tailwindcss
- SASS/LESS
- Webpack
- Gulp, Grunt
- Git
- Microfrontends
- Single-spa
- Firebase
- Vue (basics)
- Vuex
- React (basics)
- Jest
- Jasmin
- Prettier
- Husky
- Leaflet
- mxGraph
- ngx
- nxMonorepo

### EDUCATION

#### Master's degree:

National Aviation University, Telecommunications  
*September 2016 – February 2018*

#### Bachelor's degree:

National Aviation University, Telecommunications  
*September 2014 – June 2016*

**Junior specialist:**

Kyiv College of Communication, Telecommunications and mobile networks  
*September 2010 – July 2014*

**DATE OF  
BIRTH**

10 March 1995

**ADDRESS OF  
RESIDENCE****PHONE  
NUMBER  
EMAIL****LANGUAGES**

English – Upper-Intermediate  
Ukrainian – Native

**EXPERIENCE****Front-End Software Engineer** at SoftServe

*October 2020 – Present (2 year 11 mo)*

- **Product in Healthcare area for customer from Germany**

Messenger application based on Angular and web-components. This application was designed to serve as both a standalone app and a web-component that can seamlessly integrate into various sections of the customer's portal and other applications. The primary objective of this app is to ensure end-to-end encryption, and for its core functionalities, we utilize the Matrix.js library as the foundation.

Technologies: Angular, RxJS, matrix.js, ngx, nxMonorepo, Material.

Responsibilities:

- participate scrum planning, daily, retro, demo meetings;
- create proofs of concept for new features;
- implement new features, refactoring, optimizations;
- prepare app to certification;
- document and annotate code.

Team size: 13-15.

- **Product in Healthcare area for customer from USA**

Cloud-based platform that automates provider compensation and contract management for healthcare organisations. It offers accurate calculations, full transparency, and financial incentives for physicians

and providers to drive optimal outcomes and revenue. The platform also improves relationships, engagement, and long-term retention.

Technologies: Angular, RxJS, lodash, ag-grid, syncfusion, talwindcss.

Responsibilities:

- present results of work on Sprint review meetings;
- code, test, and debug technical solutions in compliance with the defined engineering standards;
- track code quality of application/reusable components;
- code-review.

Team size: 15-20

- **Product in nature resources area for customer from Canada**

Microfrontend-based portal designed for one of the largest nature resources company in North and South America. Our goal was to simplify the user experience by bringing all company applications together in one place. The implemented auth system (with SSO) enables users to access all their tools and resources seamlessly, without having to go through the hassle of multiple authentication processes for each individual application.

Portal also includes templates for Vue, React, and Angular, enabling developers to start projects with ease and efficiency. Our UI elements library, based on stencil.js and web components, is framework-agnostic, allowing for easy integration with any technology stack.

Technologies: Single-spa, microfrontend, Angular, RxJS, web-components, stencil.js.

Team size: 12-15

## **Front-End Developer at Jobs-lab**

*February 2019 – May 2022 (2 year 3mo)*

- Jobs-lab is a powerful job operating SAAS that simplifies job management and enables companies to manage their operations from a single platform. Whether you're a candidate or a company, JobsLab offers valuable benefits.
- Technologies: Angular, Typescript, RxJS, REST API, ngx-bootstrap, lodash, moment.js.
- Team size: 20-25.
- Responsibilities:
  - development and support a project on Angular 2+;
  - participate scrum planning, daily, retro, demo meetings;
  - use of best practices and approaches, code-review.

## **Front-End Developer at ItUa**

*September 2018 – January 2020 (1 year 5 mo)*

- Module for corporate portal gaming platform (Javascript, REST API, SVG, mxGraph) integrated the mxGraph library for working with flowcharts in the corporate portal ecosystem;
- Developed an alternative way to export images (processing flowchart on the client side) without using the library's capacity on the server;
- Statistics module for the corporate portal. (Typescript, Vue, Vuex, Vuetify, REST API);
- Developed a module to display statistics on the use of the project plan;
- Optimized for server requests;
- Other projects;
- Support and development of e-commerce projects and portals.
- The use of CSS + JS animations (www.mti.ua).
- The use of component approach in UI.
- Developed, on my own initiative, a library that contains components of forms with the ability to validate forms on the client side, utilities for animation and requests optimization.
- Development and support of SPA using React.js, Vue.js.
- Development of adaptive and responsive websites.

Have experience with CVS: Git, Webpack, Gulp.

## SUMMARY

I'm front-end developer with over 4 years of experience in healthcare, natural resources, HRM systems, and e-commerce. I'm proficient in Angular with basic knowledge of React and Vue. As a front-end developer, I understand the importance of paying attention to details and designing user interfaces that are clear, consistent, and user-friendly.

I have extensive knowledge and experience working with Scrum, Waterfall methodologies, and various project management ceremonies. Additionally, I am well-versed in application security, GDPR compliance, authentication, and accessibility.

My focus as a team player is to deliver results through responsible and collaborative efforts, always striving to achieve our shared goals.

## CONFITECH FEEDBACK

*"Front-end developer with 5 years of experience. Has strong knowledge of Angular, and also worked with React & Vue as well. He didn't work with NgRx on commercial projects, but has a good understanding of what it is, and has experience with ngxs, Vuex, Redux instead."*

*Worked with Drag & Drop functionality. A few last projects were big enterprise internal projects designed for 10,000+ employees (users).*

*He prefers to work in the office, not remotely. So he is totally ok with the full-time position in the Stuttgart office.*

*Speaking about his seniority level, I'd say he is very close to Senior level.*

*Maybe he is not a very strong Senior, but he is definitely above an average Middle front-end developer.*

*Current location: Kaiserslautern, Rhineland-Palatinate, Germany.*

*Soft-Skills: 5/5. Nice person to speak with.*

*German: B1 (actively learning).*

*English: Between B2 and C1. Has no communication problems.*

*Age: 28 years old.*

*Ability to start: 1-2 weeks after the offer."*
